INTRODUCTION

These *Statements of Community District Needs*, prepared by New York City's community boards, provide a context for development and assessment of their budget priorities. Pursuant to Sections 230 and 231 of the City Charter, community boards submit annual expense and capital budget priorities which must be considered by city agencies in the preparation of their departmental budget estimates.

Material preceding each statement, supplied by the Department of City Planning, summarizes district demographic and land use characteristics. The district profiles include:

- o Population counts from the 1980, 1990, and 2000 censuses. For more information on the 2000 census, see www.nyc.gov/planning.
- o Resident births and deaths within New York City, 1990 and 2001, from data prepared by the New York City Department of Health;
- o 1994 and 2002 income support levels -- Public Assistance, Supplemental Security Income and Medicaid-Only (excluding nursing home cases) -- provided by the New York City Human Resources Administration from their Medicaid Eligibility File;
- o Total land area from the Department of City Planning's computer-generated estimates of digitized community district boundaries; and
- o Land use in 2002, from the city's Real Property File as modified for parks and condominiums by the Department of City Planning. Each profile provides the number of tax lots, lot area and percentage of total lot area in each land use category.¹ Lot area is in thousands of square feet and excludes lots with missing dimensions. Lots with certain classifications, such as land under water, are categorized as "Miscellaneous". The land uses of **joint interest areas**, which are not part of any community district, are assigned to appropriate categories in the borough and citywide profiles. For example, Central Park is counted as "Open Space Recreation" in the Manhattan and New York City profiles. City and borough land use totals may therefore exceed the sum of the community districts. Note also that modifications for parks in 2002 may account for shifts among certain land use categories between 2001 and 2002.

This edition of *Community District Needs* features base maps and census tract maps for each community district, and borough maps of City Council districts. Summary 2000 census data are provided for the community districts, boroughs and the city. To better understand demographic patterns within community districts, more detailed census data are provided for each of the census tracts within the districts. The data provided by census tract this year includes population by age and nativity, income and education, and employment status of population 16 and over. Each district profile also contains a listing of line-item projects funded in the Fiscal Year 2004 Capital Budget.

The Department hopes that the information in these statements will prove useful to communities and agencies planning for future programs and services. We welcome suggestions for the next edition of *Community District Needs*.

¹

Condominiums, which have separate tax lots for each unit, are aggregated to a single tax lot per block. Only one address per condominium complex (structures under the same condominium association) is counted.
